PROFISSIONAL SUMMARY

Bachelor's Degree in Information Systems, with a strong focus on staying up to date with technology trends and market demands.

Professional experience in process automation and testing tools, including BPM (process organization) and Python(Selenium). Solid knowledge of SQL and NoSQL databases. Strong communication skills, with experience working collaboratively with teams and interacting with customers.

Extensive experience with network protocols such as OSPF, BGP, and MPLS, as well as Layer 2 technologies including VLANs, STP, EtherChannel, and LACP. Knowledge of wireless and mobile data technologies (3G, 4G, and 5G).

Over 5 years of experience in the technology and networking field.

Currently studying English with a communicative approach, focusing on practical and professional communication.

OBJECTIVES

Work in the area of testing and/or data analysis. Applying my experience in automated and manual testing, contributing to the quality and efficiency of products. Promoting bug identification and mitigating risks and failures. My goal is to improve my technical and strategic skills to always deliver the best solution, aligning with good software quality practices.
